On-Page SEO Results

Your On-Page SEO is good

Your page is mostly optimized for On-Page SEO performance. On-Page SEO is important to ensure Search Engines can understand your content appropriately and help it rank for relevant keywords. You can continue to improve your page by ensuring HTML Tag Content is completed correctly and text content is well aligned with chosen keywords.

Title Tag

You have a Title Tag, but ideally it should be shortened to between 50 and 60 characters (including spaces).

Buy Perfumes Online | Luxury & Niche Fragrances | Perfume Dubai

Length : 63

Title Tags are very important for search engines to correctly understand and categorize your content.

Meta Description Tag

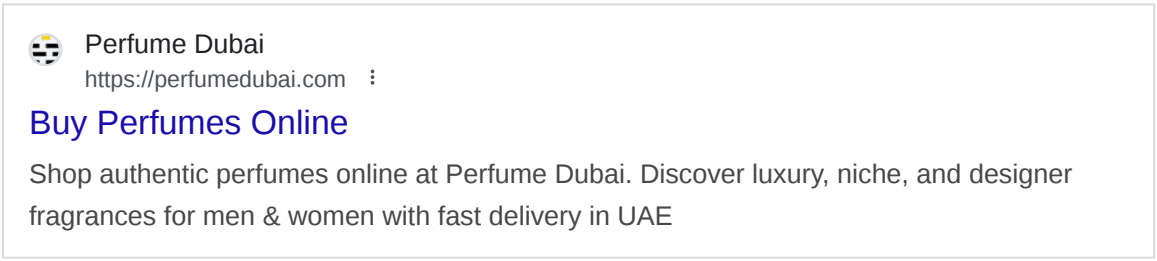

Your page has a Meta Description of optimal length (between 120 and 160 characters).

Shop authentic perfumes online at Perfume Dubai. Discover luxury, niche, and designer fragrances for men & women with fast delivery in UAE

Length : 138

SERP Snippet Preview

This illustrates how your page may appear in Search Results. Note, this is intended as a guide and Search Engines are more frequently generating this content dynamically.

Hreflang Usage

Your page is not making use of Hreflang attributes.

Language

Your page is using the Lang Attribute.

Declared: English

H1 Header Tag Usage

Your page has a H1 Tag.

H2-H6 Header Tag Usage

Your page is making use multiple levels of Header Tags.

HEADER TAG	FREQUENCY
H2	6
H3	0
H4	0
H5	1
H6	0

Heading Structure

We found issues with the heading structure of your page.

We identified a first heading of H2 rather than H1, 1 skipped heading level.

A logical heading outline helps search engines and LLMs understand how your content is organized.

Keyword Consistency

Your page's main keywords are not distributed well across the important HTML Tags.

Your page content should be focused around particular keywords you would like to rank for. Ideally these keywords should also be distributed across tags such as the title, meta and header tags.

KEYWORD	TITLE	META DESCRIPTION TAG	HEADINGS TAGS	PAGE FREQUENCY
save	✗	✗	✓	13
edp 100 ml	✗	✗	✗	2

set	✗	✗	✗	4
aed	✗	✗	✗	3

Amount of Content

Your page has a low volume of text content which search engines can interpret as 'thin content'.

Word Count: 420

It has been well researched that higher text content volumes are related to better ranking ability in general.

Image Alt Attributes

You have images on your page that are missing Alt Attributes.

We found 76 images on your page and 4 of them are missing the attribute.

Alt Attributes are an often overlooked and simple way to signal to Search Engines what an image is about, and help it rank in image search results.

Identity Schema

Organization or Person Schema identified on the page.

Organization

Entity Definition

Your page clearly defines the entity it represents.

The page clearly identifies Perfume Dubai as a Dubai luxury perfume retailer offering fragrances, beauty products, and gifts.

Contact Transparency

Your page provides business details and contact points, though these could be more complete.

The page provides social links, contact and store-locator links, but omits address, telephone, email, and registration details.

Answer Alignment

Your page lacks question-and-answer style content such as an FAQ.

The page contains no explicit FAQ, question-and-answer section, or question-style headings with corresponding answers.

Citation Readiness

Your page contains citable facts, quotes or statistics, though it could include more.

The page offers citable product names, prices, discount figures, delivery terms, and business description, though mostly commercial.

Content Structure

Your page is well structured and easy for AI to parse.

The page uses clear section headings, product grids, promotional groupings, navigation, and short service statements for strong scannability.

Content Freshness

Your page shows recency signals, though it could indicate freshness more strongly.

The page shows a 2026 copyright and current-looking AED prices, but lacks publication or update dates.

Authority & Trust Signals

Your page shows authority and trust signals, though these could be stronger.

The page displays brand logos, payment badges, and authenticity claims, but provides no certifications, authors, or external endorsements.

Some of your link URLs do not appear friendly to humans or search engines.

We would recommend making URLs as readable as possible by reducing length, file names, code strings and special characters.

Usability

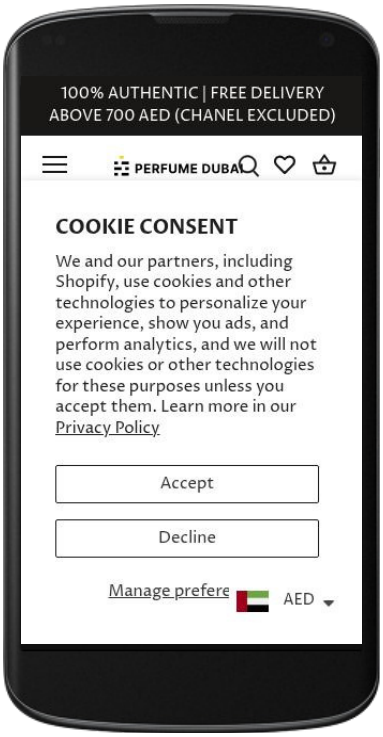

C-

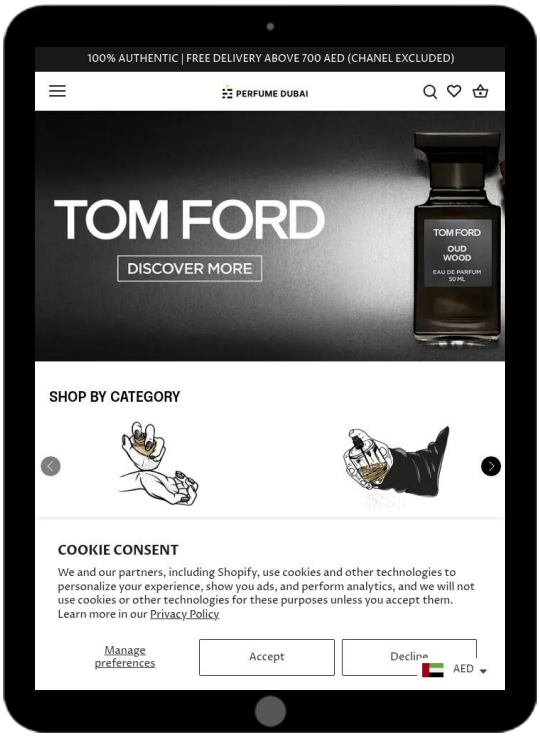

Your usability could be better

Your page is OK but could be more usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

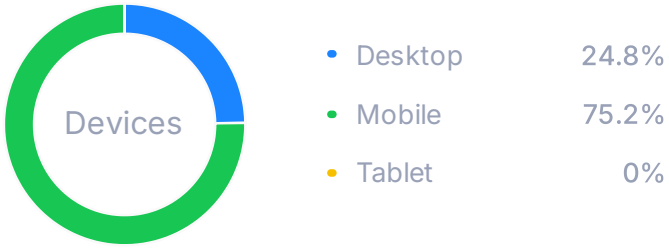

Device Usage

24.8% of your visitors browse your site on desktop devices, 75.2% on mobile and 0.0% on tablet.

Source: Google's official sampling of real Chrome visitors over the last 28 days, which excludes iPhones and iPads and so may differ from your own analytics.

Use of Mobile Viewports

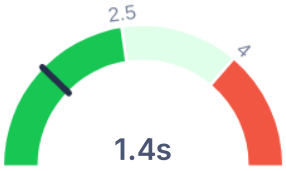

Your page specifies a Viewport matching the device's size, allowing it to render appropriately across devices.
